

K-Love is the only radio station that plays music reflecting high moral standards. K-Love commentary also reflects high moral standards. If K-Love were displaced, this style of radio station would no longer be available. Instead, more music with cursing, sexual connotations, and violence would be broadcast over the airwaves. We have plenty of that junk already. The public needs a radio station that is going to play positive music and have positive commentary, not more of the same old trash played by most stations.
